

## IDMA ONE-DAY WORKSHOPS

### ONE-DAY WORKSHOPS AVAILABLE FROM IDMA

IDMA offers three one-day workshops geared towards insurance industry professionals: *Data Management for Insurance Professionals (DMIP)*, *Insurance Data Quality (IDQ)*, and *Tools for Managing Data Effectively (TMDE)*.

#### Data Management for Insurance Professionals

Is an introductory course that provides a high-level overview of insurance data management principles.

This workshop covers the information contained in the companion study guide, and students have an opportunity to take the DMIP exam once they are comfortable with the material.

#### Insurance Data Quality

Offers participants an opportunity to learn about data quality principles and identify challenges that can hinder data quality.

The full-day program includes case studies for interactive participation.

#### Tools for Managing Data Effectively

This workshop covers advanced data management topics such as Content and Document Management, Metadata Management, Data Standards and Architecture, Business Intelligence and Analytics, and Information Governance and Security. It will also include a roundtable discussion with a panel of data experts.

#### One-Day Workshops Opportunities

One-day classes are presented at different times and locations throughout the year.

Workshops may also be taught onsite and customized to suit individual company requirements.

The IDMA will partner with you to provide a one-day classroom session to educate attendees about data management areas concepts .
